Utilities & Transportation Comm

How sweet, all Waste Comm. has to do is let you know about a rate increase and it's a go (go ahead) well do you ever consider us little people who live on a limited income and how many raises do we get? This is really stupid consideration.

Also Comcast has a same type of communication with you people. Just raising our rates a little and you guys give a big Ok. well I've already had to go back to very basic cable (I can't climb on the roof for an antenna) and I can't afford

in 80

their rates. well the rich get richer & the poor get poorer so don't worry about us little people just keep giving to these monopoly Co.
