

IMPORTANT NOTICE FOR PUGET SOUND ENERGY CUSTOMERS ABOUT PROPOSED CHANGES IN RATES

Puget Sound Energy on Oct. 28, 2015, and on Nov. 18, 2015, filed requests with the state Utilities and Transportation Commission (UTC) to adjust electric and natural gas rates. The requested changes, proposed to be effective on Jan 1, 2016, are included in the Other Charges & Credits amount listed on PSE bills:

- **Federal Incentive Tracker:** An annual true-up of the pass-through of federal income tax benefits derived from PSE's investments in the utility-owned and operated Wild Horse and Lower Snake River Wind Facilities. The filing requests to increase the credit, which will decrease electric rates for most customers but results in an increase in electric rates for some other customers.
- **Renewable Energy Credit:** Primarily due to a reduction in the level of Renewable Energy Credit net proceeds, PSE requests to lower the credit which will result in an increase in electric rates.
- **Merger Credit:** The Merger Credit, established in February 2009, will be increased, causing a decrease in electric and natural gas rates for most customers in 2016, however customers on Electric Schedules 8, 24, 449 and 459 along with customers with certain sizes of lights on Schedules 50 through 58 and customers on Natural Gas Schedules 41, 41T, 85, 85T, 86, and 86T will experience a small increase.

NATURAL GAS RATES: For households with natural gas service using a 12-month average of 68 therms per month, the effect of the adjusted Merger Credit will decrease a typical PSE monthly bill by 2 cents, or 0.03 percent.

ELECTRIC RATES: The combined effect of all three rate changes for the typical residential customer using 1,000 kWh of electricity per month will decrease a typical PSE monthly bill by 20 cents, or 0.2 percent in the monthly bill. The overall average decrease for electric customers is as follows:
