**RE: Advice No. 2016-01
Electric Tariff Filing – Filed Electronically**

Dear Mr. King:

Pursuant to RCW 80.28.060 and Chapter 480-80 WAC, please find enclosed for filing the following proposed revisions to the WN U-60, Tariff G for electric service of Puget Sound Energy. (“PSE”).

- 21st Revision of Sheet No. 25 - Schedule 25 – Small Demand General Service
- 13th Revision of Sheet No. 25-A - Schedule 25 – Small Demand General Service (Continued)
- 4th Revision of Sheet No. 26-A - Schedule 26 – Large Demand General Service (Continued)
- 6th Revision of Sheet No. 80-B - Schedule 80 – General Rules And Provisions (Continued)
- Original Sheet No. 80-B.1 - Schedule 80 – General Rules And Provisions (Continued)
- Original Sheet No. 80-B.2 - Schedule 80 – General Rules And Provisions (Continued)

The primary purpose of this filing is to implement revisions to Schedule 80 to allow PSE to provide electric service to customers via interconnection facilities subject to certain conditions. The filing also implements revisions to Schedules 25 and 26 to allow the Reactive Power Charge to not apply when the generating plant is being operated in accordance with PSE direction in regard to voltage and KVAR control. Finally, the filing corrects a typographical error in Schedule 25.

Schedule 80 presently requires an appropriate contract to provide service to a customer who has a second source of electric power; this filing eliminates this requirement for customers with a generating facility. An exception to the normal point of delivery for customers receiving service at a location remote from PSE’s distribution system and over interconnection facilities is created to allow for such delivery. Finally, sheets 80-B.1 and 80-B.2 have been created to add provisions that reflect the type of service to be provided over interconnection facilities which are not part of PSE’s distribution system and are typically not owned or maintained by PSE. Some of the new provisions describe the type of service provided, clarify that PSE will not own any service lines connected to interconnection facilities, and provide for metering and

communication. In addition, the provisions clearly state that providing electric service over interconnection facilities does not and will not result in those interconnection facilities being considered part of PSE's distribution system and provides for the Customer Service Guarantee and Restoration Service Guarantee to not apply since service is provided through customer-owned facilities over which PSE has no control.

The tariff sheets described herein reflect an issue date of January 13, 2016, and an effective date of February 13, 2016. This filing will be published by posting the change on the PSE web site immediately prior to, or coincident with the date of this transmittal letter and making information available by telephone and mail, all in accordance with WAC 480-100-193(1).

Please contact Lynn Logen at (425) 462-3872 for additional information about this filing. If you have any other questions please contact me at (425) 456-2110.

Sincerely,

Ken Johnson
Director, State Regulatory Affairs
