**RE: Advice No. 2016-03  
Electric Tariff Filing – Filed Electronically**

Dear Mr. King:

Pursuant to RCW 80.28.060 and Chapter 480-80 WAC, please find enclosed for filing the following proposed revision to the WN U-60, Tariff G for electric service of Puget Sound Energy (“PSE”).

17 <sup>th</sup> Revision of Sheet No. 58-A	- Schedule 58 – Flood Lighting Service (Continued)
2 <sup>nd</sup> Revision of Sheet No. 58-B	- Schedule 58 – Flood Lighting Service (Continued)
4 <sup>th</sup> Revision of Sheet No. 58-C	- Schedule 58 – Flood Lighting Service (Continued)
3 <sup>rd</sup> Revision of Sheet No. 58-D	- Schedule 58 – Flood Lighting Service (Continued)
Original of Sheet No. 58-E	- Schedule 58 – Flood Lighting Service (Continued)

The purpose of this filing is the addition of two additional size ranges of Light Emitting Diode (“LED”) flood lighting rates so that PSE can offer these more efficient lights to customers with these PSE-owned facilities. The two new size ranges have equivalent light output of 250 watt and 400 watt sodium vapor flood lights but only use 213 and 264 watts respectively.

PSE recently added a number of LED flood light sizes but at that time there were not LED flood lights in these two sizes that met PSE’s standards.

PSE’s Flood Lighting Service is PSE owning, operating and maintaining end-use equipment in order to provide lighting service for customers. Similar to other leasing and rental services of end-use equipment PSE already provides, this service provides customers with a comprehensive turn-key solution to their lighting needs. It stimulates the installation of energy efficient end-use equipment and provides broader access to these services.

Mr. Steven V. King

Advice No. 2016-03

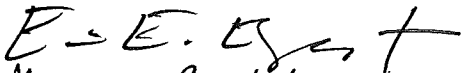

Work papers supporting rates for the new LED flood and area lights are enclosed. Rates for the capital costs were derived by using the relationship between existing rates and costs for high pressure sodium street and flood lights and the costs for these new LED area and flood lights. The energy and O&M components are based on existing rates for LED lights of the same sizes on Schedules 53 and 54.

The rider rates for the new LED flood light sizes will be the same as for PSE-owned LED street lights of the same wattage.

The tariff sheets described herein reflect an issue date of February 2, 2016, and effective dates of March 11, 2016. Posting of proposed tariff change, as required by WAC 480-100-193, is being made by posting the proposed tariff sheets on the PSE web site immediately prior to, or coincident with, the date of this transmittal letter in accordance with WAC 480-100-193(1). This filing does not increase rates or restrict access to services but instead provides for two new additional lamp sizes, therefore, no notice to customers is required by WAC 480-100-194(1).

Please contact Lynn Logen at (425) 462-3872 for additional information about this filing. If you have any other questions please contact me at (425) 456-2110.

Sincerely,
