RE: UG-170173
Discontinuing Cascade's Annual Gas Meter Statistical Sampling Program Reporting

In Advice No. W95-03-02 submitted with the Washington Utilities and Transportation Commission (Commission) on March 30, 1995, Cascade Natural Gas Corporation (Cascade or the Company) replaced its periodic meter change-out program with its current statistical sample metering program. Since this was a significant change in how the Company managed the accuracy of its meters, Cascade informally committed to filing an annual report with the Commission on its testing results. Since 1995, Cascade has continued providing the Commission with the annual results of its statistical sample metering program.

Per an email dated May 24, 2017, between Commission Staff (Betty Erdahl) and Cascade (Jennifer Gross), Commission Staff agreed to allow Cascade to discontinue submitting annual gas meter statistical sampling program reports. As requested by Staff, Cascade is submitting this letter to formalize this agreement within the public record.

Cascade acknowledges this change in reporting has no bearing on the Company's ongoing responsibility to follow the meter test procedures that are outlined in Rule 7 of its tariff in accordance with WAC 480-90-343.

If you have any questions, please call Jennifer Gross at (509) 734-4635.

Sincerely,

/s/ Brett Hudson
