Purpose of the Filing

In its 2021 Rate Case, PacifiCorp requested approval of major capital additions, including projects that were part of its Energy Vision 2020 resource strategy, the Pryor Mountain Wind Project, and the Foote Creek I Wind Repowering Project. In accordance with the Commission-approved settlement stipulation in the 2021 Rate Case, the Company is making this filing for the prudency review of major capital additions included in the rates approved but placed in service after May 1, 2020. Specifically, the Company’s filing supports the prudency and costs of the following capital projects: the Ekola Flats, TB Flats, Cedar Springs II, and Pryor Mountain New Wind Projects; the Dunlap and Foote Creek I Wind Repowering Projects, and the Aeolus to Bridger/Anticline 500 kilovolt (kV) Transmission Line Sequence 4 project and the associated 230 kV network upgrades. PacifiCorp proposes to decrease electric rates by $616,600 and proposes to refund approximately $2.1 million to customers.

As discussed in the testimony of Mr. Robert M. Meredith, the Company presents the combined impacts of this filing with the recently filed Power Cost Only Rate Case (PCORC). The PCORC reflected an increase of approximately $13.1 million, or average increase of approximately 3.7 percent. When combined with the decrease proposed in this filing, the net increase that will be effective on January 1, 2022, is approximately $10.4 million, or 2.9 percent. All customer classes

for electric service are affected by the change. A typical residential customer using 1,200 kilowatt-hour per month will see a net increase of $2.95 per month.
