

Will Avista SKYROCKET Your Electric Rates?

Posted on [April 18, 2018](#) by [Shari Dova](#)<http://gemstatepatriot.com/blog/will-avista-skyrocket-electric-rates/>

ELECTRICITY RATES HAVE JUMPED, IN SOME CASES 1,000%, IN THE LAST DECADE

Dozens of concerned citizens turned out for the presentation of the dangers associated with a merger between Avista Utilities and Hydro One.

Avista and Hydro One would like you to believe this is a done deal, however, there are still several steps to take.

FERC approves Avista-Hydro One deal

¹Several other federal authorizations will be needed, and the companies said they will be making those filings in the coming months. The deal will also require approval from state regulators in Washington, Idaho, Oregon, Montana, and Alaska.

The presentation was given by geologist David Boleneus and sponsored by the North West Property Owners Alliance ([NWPOA](#)).

Boleneus has obviously been [studying this issue](#)² intently and came prepared with handouts you can view below. The amount of information is almost too much to absorb in a single sitting.

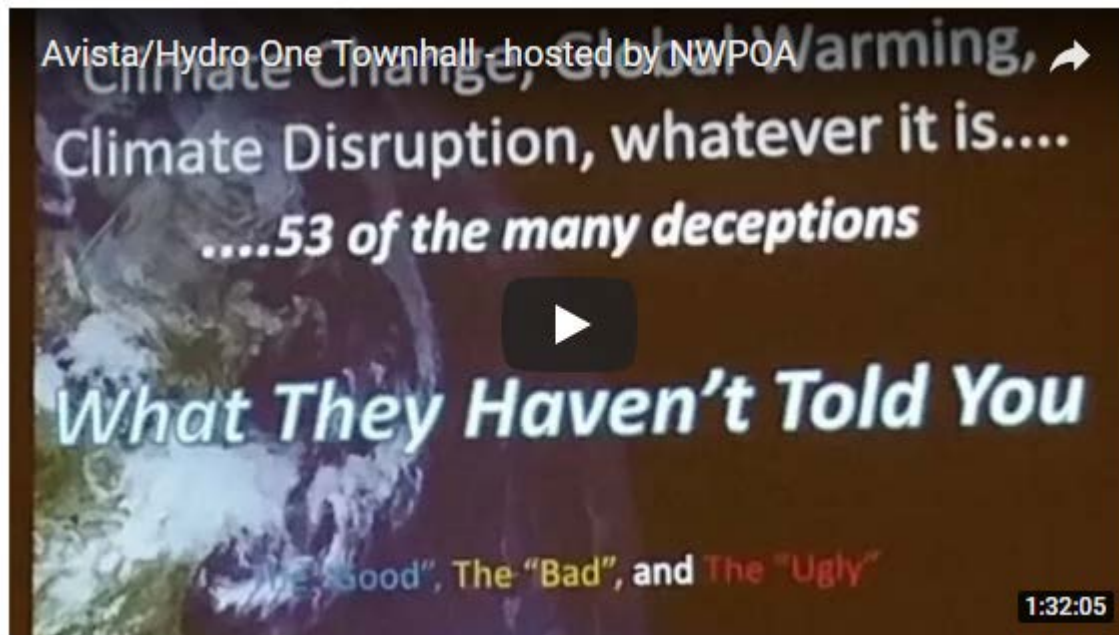

He has [previously told us](#)³ about Hydro One, who provides electric power in Ontario, Canada, and wants to acquire Avista Corp.

The deal exposes Avista electric customers to nightmarish effects of [foreign](#)⁴ practices and policies that Avista seems mostly unaware as to the extent of those impacts.

Boleneus explained what has happened on the Hydro One home turf in [Ontario](#)⁵, putting families into poverty over the [soaring electricity rates](#)⁶, and how it will happen in America if this merger with Avista is allowed to complete.

Electricity rates have jumped, [in some cases](#)⁷ 1000%, in the last decade and there are families forced to walk away from their homes as their power bills surpass their mortgage payments. Many families are forced to choose between food and heat.

Will our government allow the same thing to happen to our citizens?

Angelo Lonziserio ·

Sandpoint, Idaho

Of note is that part of the settlement agreement negotiated between Idaho PUC and Hydro One and Avista is that if Hydro One runs into financial trouble a "GOLDEN ENTITY" will take control of the company. This Entity is not named in the agreement and will be picked after the deal/merger/sale is completed. Why isn't this entity identified beforehand? A possible scenario could be an Indian Tribe is the entity that could take control and who could then restrain their actions since they claim to be independent nations and do not answer to our laws. Something to yhink about. 3 public meetings to be held soon in Idaho. ATTEND THESE AND SPEAK OUT AND ALSO COMMENT VIA EMAIL AND LETTERS AND ALSO CONTACT OUR IDAHO AND FEDERAL LEGISLATORS AND FEDERAL DEPT HEADS

AND LET THEM KNOW HOW CONCERNED WE ARE
