Subject: Puget Sound Energy Integrated Resource Plan (UE-120767)

Dear Chairman Danner, Washington Utilities and Transportation Commission: I would rather you burn logging slash to generate steam. The health and climatic costs associated with burning anything "fossil" is not worth the associate power. As a customer of PSE, I believe that it's important to include the estimated social and economic cost of carbon in any final Integrated Resource Plan submitted to your commission. I am committed to investing in clean, renewable energy and reducing our reliance on carbon intensive sources of energy like the Colstrip Generating Facility. We all must prepare for a carbon-constrained future, and I ask that all final recommendations in the IRPs coming before the UTC include a broad examination of carbon pollution, new federal air quality standards, and other environmental costs associated with the continued operation of the Colstrip facility. Thank you,

Bruce Hunner
