**Docket UE-210795
Puget Sound Energy
PSE 2021 Clean Energy Implementation Plan**

FRONT AND CENTERED AND NW ENERGY COALITION DATA REQUEST NO. 169:

Please provide all documents illustrating how each CBI will be tracked/quantified for each specific action or generic program outlined in Chapter 4 of PSE's CEIP. Specifically, what variables or data fields will be required to be tracked/collected to estimate metrics associated with each CBI, including data source (e.g., available internally through the utility, collected during program implementation, estimated through third-party program evaluation)?

Response:

Please see the Clean Energy Implementation Plan ("CEIP"), Chapter 3, for a description of how each customer benefit indicator ("CBI") will be tracked. There are no additional documents to provide at this time regarding how these CBIs are linked to specific actions other than the information provided in the CEIP and its attachments. Puget Sound Energy anticipates having more documentation to share regarding the application of CBIs as part of the 2023 Biennial CEIP Update. The variables and data fields that will be collected for each CBI are described in Chapter 3, and specifically, Appendix H.
