REQUEST:

Please provide all internal documents, presentations, or communications that demonstrate how Avista plans to define success of the LEAP Pilot program at the end of three years.

RESPONSE:

The Company has not yet developed any internal documents, presentations, or communications that demonstrate how it plans to define success of the LEAP pilot program at the end of the three year pilot period. Some of the criteria that the Company will likely consider in evaluating the success of the program are the following:

- Total number of new customer hook-ups
- Number of new development hook-ups
- Number of new construction hook-ups (i.e., infill of existing developments or single lots)
- Total number of conversions
- Number of conversions from Avista electric customers
- Number of conversions from non-Avista electric customers
- Customer satisfaction and feedback
- Emissions reductions
