Statement of Qualifications

My career has spanned over twenty years in the communications industry. I have held a series of increasingly more responsible positions within industry, state, and federal government. I have presented oral and written testimony as an expert witness before the Washington Utilities and Transportation on regulatory matters in dockets pertaining to telecommunications competition, network investment, policy, and service quality related to incumbent local exchange companies and competitive local exchange companies registered in Washington State. I have additionally presented oral testimony as an expert witness before the Washington State Legislature on network costs, emergency services, alternate forms of regulation; and before the California, Idaho, and New Mexico Public Utility Commissions as a Federal Communications Commission representative concerning telecommunications number resources and jurisdiction. I am serving or have served on numerous voting boards and forums; including the Washington State 911 Advisory Council, the Regional Oversight Committee, NARUC subcommittee; and the Federal Communication Commission's North American Numbering Council.
