

1 **Q. Please state your name, business address and present position with PacifiCorp,**  
2 **dba Pacific Power & Light Company (the Company).**

3 A. My name is William R. Griffith. My business address is 825 NE Multnomah Avenue,  
4 Suite 800, Portland, Oregon. My present position is Director, Pricing & Regulatory  
5 Operations, in the Regulation Department.

6 **Qualifications**

7 **Q. Briefly describe your educational and professional background.**

8 A. I have a B.A. degree with High Honors and distinction in Political Science and  
9 Economics from San Diego State University and an M.A. in Political Science from that  
10 same institution; I was subsequently employed on the faculty for one year. I also  
11 attended the University of Oregon and completed all course work towards a Ph.D. in  
12 Political Science. I joined the Company in the Pricing & Regulatory Affairs Department  
13 in December 1983. In June 1989, I became Manager, Pricing in the Regulation  
14 Department. In February 2001, I assumed my present responsibilities.

15 **Q. Have you appeared as a witness in previous regulatory proceedings?**

16 A. Yes. I have testified on behalf of the Company in regulatory proceedings in the states of  
17 Washington, Oregon, Utah, Wyoming, and California.

18 **Purpose of Testimony**

19 **Q. What is the purpose of your testimony?**

20 A. My testimony describes the Company's proposal to modify the Centralia Credit and the  
21 Merger Credit in order to implement recovery of deferred Excess Net

22

1 Power Costs.

2 **Q. Please describe the Company's proposal.**

3 A. The Company proposes to modify currently effective Schedule 97, Adjustment  
4 Associated with the Sale of Centralia (Centralia Credit), and Schedule 99, Credit from  
5 ScottishPower (Merger Credit), to suspend the amounts currently being credited.  
6 Those amounts would be applied instead towards recovery of the \$17.5 million in  
7 Excess Net Power Costs described by Mr. Widmer.

8 **Q. What is the current balance remaining in the Centralia and Merger Credit**  
9 **accounts?**

10 A. As of October 2002, the Centralia Credit account contains about \$10.2 million. The  
11 Merger Credit account contains about \$6.8 million. As of January 1, 2003, we expect  
12 these accounts will contain approximately a total of \$14.8 million remaining to be  
13 distributed.

14 **Q. Why does the Company propose this method for recovering Excess Net Power**  
15 **Costs?**

16 A. For the reasons discussed in Mr. Larsen's testimony, the Company believes that  
17 suspending the Centralia Credit and the Merger Credit will provide some relief for  
18 extraordinary power costs while preserving our commitment under the Rate Plan to  
19 maintain base rate stability.

1 **Q. What is the effect of the Company's proposal on customers?**

2 A. This proposal removes two credits that currently appear as separate line item  
3 adjustments on customers' bills. The Centralia Credit currently produces an average  
4 2.8 percent reduction to customers' bills, while the Merger Credit results  
5 in a 1.7 percent reduction to customers' bills. The effect of removing these two credits  
6 will increase customers' bills by an average of 4.6 percent. For a residential customer  
7 using 1000 kWh per month, this will result in an increase of \$2.45 per month. The  
8 Company's proposal has no effect on base rates.

9 **Q. Over what period would the Company's proposal be in effect?**

10 A. As shown in Exhibit \_\_\_(WRG-1), the Company expects its proposal would result in  
11 annual recovery of about \$8.6 million. Based on the projected balance in the Centralia  
12 Credit and Merger Credit accounts of \$14.8 million as of January 2003, the proposal  
13 would be in effect for approximately 21 months as the credit balances are eliminated.

14 **Q. Will there be a change in rates once the credit balances have been  
15 extinguished?**

16 A. No. Under the Company's proposal in this case, there would be no further changes  
17 after January 1, 2003 through the remainder of the Rate Plan Period.

18 **Q. In the event the Centralia Credit and Merger Credit balances prove to be  
19 insufficient to recover the Excess Net Power Costs in rates, how does the  
20 Company propose to recover any remaining balance?**

1 A. As discussed in Mr. Larsen's testimony, the Company proposes that any remaining  
2 balance after exhausting the Centralia and Merger Credits be retained in the deferred  
3 account and addressed in the Company's next general rate filing in Washington after  
4 expiration of the Rate Plan Period.

5

1 **Q. How will the Company's proposal be affected if recovery does not commence as**  
2 **of January 1, 2003?**

3 A. As discussed in Mr. Larsen's testimony, a surcharge may be necessary if a delay in  
4 recovery results in the remaining balance in the combined credit accounts falling far short  
5 of that necessary to recover the Excess Net Power Costs. We are not making a  
6 specific proposal for such a surcharge now, however, since the Company's proposal  
7 would make that remedy unnecessary.

8 **Q. As a result of this proposal, how will the Company's rates be positioned relative**  
9 **to other utilities?**

10 A. The Company's Washington rates will continue to be among the lowest in the United  
11 States. According to the most recent Edison Electric Institute (EEI) survey (January  
12 2002), the Company's total average Washington rates rank 14<sup>th</sup> lowest out of 160  
13 utilities. Including the effects of this change, and assuming no other rate changes among  
14 the other utilities, the Company's rates would be ranked 28<sup>th</sup> lowest.

15 **Q. How would the Company's residential rates be positioned relative to other**  
16 **utilities?**

17 A. Currently, the Company's residential rates are ranked seventh lowest out of 162 utilities  
18 in the EEI residential rankings. Including the effects of the Company's proposal, and  
19 assuming no other rate changes for the other utilities reporting, the Company's  
20 residential rates would be ranked eleventh lowest out of 162 utilities.

21

1 **Q. Among Washington utilities, how would the Company's residential rates be**  
2 **positioned if this proposal were approved?**

3 A. In 2002, out of twelve Washington utilities considered by Standard & Poor's, the  
4 Company's Washington residential rates were ranked third lowest in the state  
5 (Exhibit \_\_\_(WRG-2)). Based on rates that would be in effect with approval of the  
6 Company's proposed price change, and assuming no rate changes for the other utilities,  
7 the Company's ranking would shift only slightly—it would be fourth lowest out of 12  
8 utilities.

9 **Q. Please describe Exhibit \_\_\_(WRG-3).**

10 A. Exhibit \_\_\_(WRG-3) contains proposed tariffs to implement this collection mechanism.  
11 For Schedule 97 and Schedule 99, the Company proposes to add a paragraph to these  
12 tariffs as follows:

13 Excess Net Power Cost Offset. In addition, effective January 1, 2003,  
14 adjustments shown in this tariff will be applied to offset Excess Net Power  
15 Costs and will not be applied to the customer's bill. This offset will expire upon  
16 recovery of Excess Net Power Costs as determined by the Washington Utilities  
17 & Transportation Commission.

18  
19 **Q. Please summarize your testimony.**

20 A. The Company's proposal to recover Excess Net Power Costs by modifying the  
21 Centralia and Merger Credits will leave base rates unaffected and will have minimal  
22 impacts on our customers. Our customers would continue to see some of the lowest  
23 rates in both Washington and the United States upon approval of the Company's  
24 proposal.

1 Q. **Does this conclude your testimony?**

2 A. Yes, it does.
