Subject: Puget Sound Energy Integrated Resource Plan (UE-120767)

Dear Chairman Danner, Washington Utilities and Transportation Commission: As a customer of PSE, I believe that it's important to remind them that clean renewable energy sources are the inevitable future...not coal-fired power plants. Investing heavily in renewable energy is like a long term deposit; it makes good business sense, and is vastly more healthy for people, and the planet. We must reduce our reliance on carbon intensive sources of energy like the Colstrip Generating Facility. I ask that all final recommendations in the IRPs coming before the UTC include a broad examination of carbon pollution, new federal air quality standards, and other environmental costs associated with the continued operation of the intensely polluting Colstrip facility. Thank you,

Nora Weaver
