RE: Avista - HydroOne Merger

To Whom It may Concern :

We are totally AGAINST this proposed merger.

Selling any of this nation's infrastructure to a foreign entity in our opinion constitutes treason.

"Green energy" is a fraud. The Creator of the universe knows the beginning from the end and controls the weather. There has always been variations in the climate around the world through the centuries.

Again, we are against this merger.

Best Regards,  
Richard and Carol Goddard  
Valley, WA
