Subject: Puget Sound Energy Integrated Resource Plan (UE-120767)

Dear Chairman Danner, Washington Utilities and Transportation Commission: My husband and I are customers of PSE. We've also done some retro-fitting of our home through the Community Energy Challenge, we plan a new high efficient furnace next year, and we participate in paying into your green energy program. We're trying to do our part to reduce the pollution that is already biting us from fossil fuel burning. We would like to see PSE step up and do more like we are doing more--be accountable for the true externalized costs of continuing to burn coal. As long as there are incentives for homeowners, and as business owners get the word of new conservation options and alternative energy sources, that blunts the economic argument that consumers won't pay more. In this day and age, that becomes a poor excuse for polluting. Keep your customers from jumping off the grid by making a coal shutdown a part of your final Integrated Resource Plan. Thank you,

Jean Waioght
