2. Customers taking service at Secondary Voltage and whose Billing Demand is 350 kW or below for eleven (11) of the most recent 12 consecutive months are not eligible for service under this schedule.
3. Deliveries at Secondary voltage at more than one point will be separately metered and billed. Deliveries at Primary voltage to a Customer will be at one Point of Delivery for all service to that Customer on contiguous property.
4. Single-phase motors rated greater than 7-1/2 HP shall not be served under this schedule except by the express written approval of the Company.
5. Highly intermittent loads, such as welders, X-ray machines, elevators, and similar loads that may cause undue lighting fluctuation, shall not be served under this schedule unless approved by the Company.
6. For service at Primary voltage, all necessary wiring, transformers, switches, cut-outs and protection equipment beyond the Point of Delivery shall be provided, installed and maintained by the Customer, and such service facilities shall be of types and characteristics acceptable to the Company. The entire service installation, protection coordination, and the balance of the load between phases shall be approved by Company engineers.

3. The load is at a remote or inaccessible location that is not feasible to be served at secondary voltage from Company facilities.
4. All necessary wiring, transformers, switches, cut-outs and protection equipment beyond the point of delivery shall be provided, installed and maintained by the Customer, and such service facilities shall be of types and characteristics acceptable to the Company. The entire service installation, protection coordination, and the balance of the load between phases shall be approved by Company engineers.

**SCHEDULE 142**  
**REVENUE DECOUPLING ADJUSTMENT MECHANISM**

**1. APPLICABILITY:**

This rate schedule is applicable to all Customers of the Company that receive service under Schedules 7, 7A, 24, 25, 26, 29, 31, 35, 40, 43, 46, 49, 50 through 59, 448, 449, 458 and 459, as well as equivalent schedules such as Residential and Farm Schedules. Rates in this schedule will be applied to all bills of applicable Customers with Energy usage during a month when this schedule is effective.

**2. PURPOSE:**

The purpose of this schedule is to establish balancing accounts and implement a rate adjustment mechanism that decouples the Company's revenues recovered from certain customers that are intended to recover delivery costs from sales of electricity. Its purpose is to also implement a rate plan for all other applicable customers.

**3. RATE GROUPS:**

- a. Decoupled Residential Customers: Customers served under Schedules 7 and 7A.
- b. Decoupled Large General Service Customers: Customers served under Schedules 12 and 26. (N)
- c. Decoupled Primary General Service Customers: Customers served under Schedules 10, and 31. (N)
- d. Decoupled Other Non-Residential Customers: Customers served under Schedules 8, 11, 24, 25, 29, 35, 40, 43, 46, and 49. (C)
- e. Rate Plan Customers: Customers served under Schedules 50 through 59, 448, 449, 458 and 459. (T)

**4. DECOUPLING MECHANISM:**

- a. Decoupling Calculation:
  - i. The Revenue Decoupling Adjustment (RDA) reconciles on a monthly basis, separately for Decoupled Residential Customers and Decoupled Other Non-Residential Customers, differences between (i) the monthly Actual Delivery Revenue resulting from applying a Delivery Revenue per Unit of 2.7555 cents per kWh for Decoupled Residential Customers and 2.1661 cents per kWh for Decoupled Other Non-Residential Customers to their Energy sales, and (ii) the Allowed Delivery Revenue that would be collected by applying the Monthly Allowed Delivery Revenue Per Customer (see iv below) by the active number of Customers in each group for each month. (C)
  - ii. The RDA reconciles on a monthly basis, and separately for Decoupled Large General Service Customers and Decoupled Primary General Service Customers, differences between (i) the monthly Actual Delivery Revenue resulting from applying the following Delivery Revenue per Unit for Customers serviced under each Schedule in each season to their seasonally differentiated kW demands, and (ii) the Allowed Delivery Revenue that would be collected by applying the Monthly Allowed Delivery Revenue Per Customer (see iv below) by the active number of Customers in each group for each month. iii. The difference resulting when the Actual Delivery Revenue is subtracted from the Allowed Delivery Revenue is accrued monthly in the RDA Balancing Account. The monthly amount accrued will be divided into sub-accounts so that net accruals for Decoupled Residential Customers, Decoupled Large General Service Customers, Decoupled Large Primary Service Customers and Decoupled Non-Residential Customers ("Decoupled Customers") can be tracked separately. The sub-accounts will accrue interest at a rate equal to that determined by the Federal Energy Regulatory Commission pursuant to 18 CFR 35.19a.
