PC-100 Re: Plant Additions.

Refer to the response to PC-45, specifically for Project FP-315671 – Install Main Walla Walla. The response shows the project was placed into service on the Company's books on December 28, 2016. Since the project was placed into service in 2016, please explain why it is included in Exhibit MPP-6 as a proposed adjustment for post-test year plant additions.

Response:

Even though the project was in service on 12/28/2016, the majority of the costs were not booked to plant until 2017. The majority of the costs were added to plant in March 2017.
