# Find your port

There are 75 ports in the state, located in 33 of the 39 counties.

Notice something? Not all ports are located on waterways -- and they don't need to be! Many airports and railways are port districts.

The primary purpose of a port district in Washington is economic development – port districts can build and operate airports, marine terminals, marinas, railroads, and industrial parks, and in some cases, promote tourism.

You can find out more about the port districts in Washington, including contact information, by clicking on a port district's photo below.
