CenturyTel Service Information

About Us

CenturyTel provides reliable Internet access and Web hosting to communities across the country. CenturyTel is mainly a rural telecommunications company serving customers in 22 states. Dial-up Internet service is available in 17 states throughout the Midwest, Great Lakes, Pacific Northwest, and Southern United States. To see if Dial-up Internet service is available in your specific area, enter your city name and state, then click "Search". To use the map, click on your state to see a list of all access numbers for a particular state.

City:

State: Alabama

SEARCH

As a division of CenturyTel, we provide bundled billing and payment options that other ISPs can't. If you have phone service through CenturyTel, your Internet service will appear on the same bill for your convenience. Our capabilities, services, and service areas are growing almost as rapidly as the Internet itself!

Dial-up Access

Fast and Reliable Connections

CenturyTel.net provides dependable Internet access and Web hosting services to communities across the country. CenturyTel's primary focus is rural telecommunications. Currently, our company services customers in 21 states. Our Internet service is available in 13 states in the Great Lakes region, Pacific Northwest region, and Southern United States.

We deliver reliable high-performance services. Users dial into 56Kbps V.90 modems throughout the CenturyTel areas allowing for the fastest possible dial-up connections over regular telephone lines. CenturyTel.net has a user-to-modem ratio of approximately 8:1, one of the best in the industry, resulting in fewer busy signals for you.

Economy Plan

Access the Internet for 10 hours each month for \$9.95 monthly, plus \$1.95 for each additional hour.

Availability | Sign-up today!

Standard Plan

Enjoy unlimited access* to the Internet and 5MB free personal Web space for \$19.95 monthly.

* Please refer to our Terms & Conditions for the acceptable use policy.

Express Roaming

Express Roaming allows you to use local dial-up numbers around the world to access your CenturyTel account economically. Read on to find out how to activate this feature and make use of it when your travelling.

What are the advantages?

- Significantly cheaper than long distance charges
- Use locations worldwide while maintaining 1 account
- Use your existing Internet & e-mail software

How much does it cost?

\$4.95/month to have dial-up access anytime, anywhere the road takes you!

U.S. (lower 48) 2 hours FREE (.06/minute after 2 hours)

AK, HI & International.... .44/minute

Can I use another CenturyTel dial-up number without incurring roaming charges?

Yes, use your account to dial into any of CenturyTel's existing Internet locations. Using our customized dialer, you will see that all CenturyTel locations are identified with (CTL) beside the city's name. Roaming charges do not apply to any of these dial-up locations. However, long distance charges may apply. Double-check with the local telephone operator to be sure if the city you selected is a local call. CenturyTel cannot be held responsible for long distance charges.

Where cities are covered?

There are currently over 4,000 local dial-up numbers throughout the world. For coverage, see our complete list of Express Roaming cities.

How does it work?

- First, call your local Customer Service office to or Sign-Up online for "Express Roaming."
- Read and follow the download instructions on how to install and use the iPass Roaming Wizard.
- Download and install CenturyTel's customized dialer.

How do I send e-mail while using iPass?

In order to use our mail servers and iPass in conjunction, you must first login via our Web site. Go to centurytel.net, then click "Account Tools," then "Mail Roaming. Once you have done that, you will receive this message, "Your current IP is being added to the mail server for access for outbound SMTP mail traffic. Access could take between 3-5 minutes to be added. Your IP will be active for 45 minutes and then will be removed. If you need access after the 45 minutes, you will need to return to the Web page to obtain access again."
