Summary of Effects of Proposed Sale on PSE's Existing Transmission Capacity

October 2, 2020

Exh. ASR-9: SUMMARY OF EFFECTS OF PROPOSED SALE ON PSE'S EXISTING TRANSMISSION CAPACITY	
PSE Current Total Transmission Capacity	750
Capacity for Transmission of Output from Colstrip Unit 3	-185
Sale of Initial Purchase Assets	-95
Capacity for Transmission of PPA Output/Option Assets*	-90
TOTAL REMAINING CAPACITY	380

* The transmission capacity used to transmit the PPA output would become the Option Assets at the end of the PPA term. At the time, NorthWestern Energy could, at its sole option, purchase these assets from PSE. If NorthWestern declines this option, PSE would keep this transmission capacity.
