Re: DID Numbers for [Redacted]

Tom,

[Redacted] is in the construction phase of a new building located on our [Redacted] [Redacted]. In reviewing our current numbering plan we found that we have approximately 70 available numbers for Pierce County sites.

For this building and other planned sites in the Tacoma area, we need 2,000 additional numbers. [Redacted] currently has 3,000 DID numbers today. We will return approximately 500 numbers once we receive the new numbers.

would like to have the numbers no later than April 15th, 2007, in order to prepare Marketing campaigns, business cards, place directories advertising, etc.

We would like to have consecutive numbers. Our current number ranges are 459-6000 through 459-8499 and 680-6000 through 680-6599. We have only used a few of the 680 numbers and would be able to give back most of the 680 numbers.

[Redacted] can't use blocks that begin with 372, 530, or 876 because of our internal dialing plan.

If you have questions, please give me a call.
