March 27, 2006

Dear Ms. Roland and Ms. Clairmont:

I am writing to request a block of 5000 DID numbers for [REDACTED] is moving to a centralized [REDACTED] VoIP phone system where DID numbers will be assigned to each phone in the district, but managed centrally at [REDACTED] or the [REDACTED]. This new system will include all schools, buildings and support facilities. This move is a component of our requirement for [REDACTED] to be in compliance with e911 requirements as directed by OSPI and the state of WA Fire Marshalls.

[REDACTED] currently has 900 DID numbers across six ranges. As we move to the new DID number range, [REDACTED] will release 400 DID numbers. The remaining 500 DID numbers are currently lead line, fax line, HVAC, elevator, fire and alarm lines spread throughout the [REDACTED] nearly 50 locations. We have 38 [REDACTED] sites and the balance is existing [REDACTED] that are not occupied or are support facilities.

Qwest Communications Global Account Team is working with [REDACTED] to fully enable services for [REDACTED]. The release of existing DID numbers will commence upon transfer of services to new numbers and a brief period of call routing to assure number transport to the new DID block.

Please let me know what additional information is needed to proceed with this order. Thank you for your assistance.

Sincerely,

[REDACTED]
