Subject: Docket No. 101082

Penny

Our records show that we lost one of our two engines on the "Victoria Clipper III" as the vessel arrived Friday Harbor on Sunday, 13 June 2010. The vessel went back into service on Sunday, 27 June 2010. The delay in replacing the engine was due to the non-availability of any Detroit Diesel 149 engine blocks in North America. Pacific Power of Kent, Washington put one together from scratch at considerable expense in order to limit our down time during peak season. The vessel continued to sail as per our approved schedule until the end of the season.

I am trying to locate an e-mail advisory at this time. I will let you know when and if I can locate a copy. Thank you for your assistance, Darrell
