**Re: 2015 ETC Certification
CenturyLink's 2015 ETC Certification Report, and Plan for
Universal Service Support Expenditures in Accordance with
WAC 480-123-070, and WAC 480-123-080**

Dear Mr. King,

In response to the requirements of WAC 480-123-070, Annual Certifications and Reports, and WAC 480-123-080, Annual Plan for Universal Service Support Expenditures, CenturyLink QC ("CenturyLink") provides the following information. For ease of reading, CenturyLink will list each of the requirements under the rules followed by its response.

WAC 480-123-070 Annual Certifications and Reports.

Not later than July 1 of each year, every ETC that receives federal support from any category in the federal high-cost fund must certify or report as described in this section. The certifications and reports are for activity related to Washington State in the period January 1st through December 31st of the previous year. A company officer must submit the certifications in the manner required by RCW 9A.72.085.

Response: The declarations of a CenturyLink officer certifying to the data contained in this filing are in Attachment A.

(1) Report on use of federal funds and benefits to customers.

REDACTED
CONFIDENTIAL PURSUANT TO WAC 480-07-160

- (a) The report must provide a substantive description of investments made and expenses paid with support from the federal high-cost fund.

The report must include the company's gross capital expenditures and operating expenses made with federal high-cost support received by the ETC in the preceding calendar year along with a description of major projects and affected exchanges. A rate of return wireline ETC must also include a copy of its NECA-1 report for the preceding calendar year.

Response: CenturyLink QC certifies that high-cost support funds received by CenturyLink QC during the 2014 calendar year were used only for the provision, maintenance and upgrading of facilities and services for which the support was intended (See Attachment A).

During the calendar year 2014, CenturyLink QC accepted a total of \$2,652,936 of high-cost support for the state of Washington. Attachment B is a copy of the NECA disbursement report detailing the amount, category and timeframe of the high-cost support received by CenturyLink QC.

CenturyLink QC's 2014 statewide network capital investments totaled BEGIN CONFIDENTIAL *****END CONFIDENTIAL. Total network maintenance expenses (total cost of service excluding access expense) in Washington for 2014 totaled BEGIN CONFIDENTIAL***END CONFIDENTIAL. As such, CenturyLink QC's actual capital expenditures and maintenance expenses totaled BEGIN CONFIDENTIA*****END CONFIDENTIAL during the certification period for the provision maintenance and upgrading of facilities and services significantly exceeding the \$2,652,936 in high-cost support received.

- (b) Every ETC must provide a substantive description of the benefits to consumers that resulted from the investments and expenses reported pursuant to (a) of this subsection.

Response: CenturyLink QC made substantial investments during the calendar year 2014 as well as over the previous several years that allow it to provide reliable and robust telecommunication services to its customers. Through the expenditure of Federal HighCost Support funds, CenturyLink QC was able to continue to provide services at a level that meets the requirements of 47 U.S.C. §254 with the intent of providing high quality telecommunication services to customers in the service areas for which it receives high-cost support. Additionally, in accordance with FCC 11-161,

the USF Transformation Order, CenturyLink QC is expanding its data network, enabling more customers access to quality high speed data services.

(2) Local service outage report.

(a) The report must include detailed information on any outage in the service area (during the prior calendar year) of at least thirty minutes in duration in which the ETC owns, operates, leases, or otherwise utilizes facilities, that potentially affect:

- (i) At least ten percent of the end users; or
- (ii) A 911 special facility, as defined in 47 C.F.R. Sec. 4.5(e).

(b) Specifically, the eligible telecommunications carrier's annual report must include information detailing:

- (i) The date and time of onset and duration of the outage;
- (ii) A brief description of the outage and its resolution;
- (iii) The particular services affected;
- (iv) The geographic areas affected by the outage;
- (v) Steps taken to prevent a similar situation in the future; and
- (vi) The number of customers affected.

Response: CenturyLink QC is exempt from this requirements as it is subject to WACs 480-120-412 and 480-120-439(5).

(3) Report on failure to provide service.

The report must include the number of requests for service from potential customers within its designated service area that were unfulfilled during the prior calendar year. The ETC must also detail how it attempted to provide service to those potential customers.

Response: CenturyLink QC is exempt from this requirements as it is subject to WAC 480-120-439(5).

(4) Report on complaints per one thousand connections (fixed or mobile).

The report must provide separate totals for the number of complaints that the ETC's customers made to the Federal Communications Commission and the consumer protection division of the office of the attorney general of Washington. The ETC must also report the number of consumer complaints in each general category (for example, billing disputes, service quality).

Response: Attachment C provides information on customer complaints to the FCC and to the Consumer protection division of the attorney general of Washington lines for 2014. The complaint categories include billing, call handling, commitment/interval, held order, installation, repair, treatment, and other. Furthermore, Attachment C provides a breakdown of all its 2014 complaints regardless of whether they were complaints for a supported service or for other services not supported by high cost funding.

CenturyLink QC's efforts to resolve complaints for all complaint categories are based on the following process:

- Review the complaint to determine the nature of the problem
- Review CenturyLink QC's records/data to substantiate the claim
- Determine if CenturyLink QC's practices, which may have led to the complaint, are in accord with applicable statutes and rules
- If CenturyLink QC determines that its actions/practices that led to the complaint are in accord with applicable statutes and rules, it will provide substantiation for its claim to the investigating agency
- If CenturyLink QC determines that its actions/practices that led to the complaint are not in accord with applicable statutes and practices, it will attempt to resolve the problem (i.e., service credits, service repair, etc.)
- If CenturyLink QC determines that its actions/practices that led to the complaint are not in accord with applicable statutes and practices, and it is a systemic problem, it will notify the appropriate CenturyLink QC business/operation unit to take corrective action to fix the deficient or defective systems or processes.
- In any event, CenturyLink QC always works closely with the regulating agencies to quickly resolve customer's service-affecting issues.

(5) Certification of compliance with applicable service quality standards.

Certify that it met substantially the applicable service quality standard found in WAC 480-123-030 (1)(h).

Response: For the calendar year 2014, CenturyLink QC certifies that it substantially met the applicable service quality standards found in WAC 480-123-030 (1)(h). CenturyLink QC's officer certification for this section is in Attachment A.

(6) Certification of ability to function in emergency situations.

Certify that it had the ability to function in emergency situations based on continued adherence to the standards found in WAC 480-123-030 (1)(g).

Response: CenturyLink QC certifies that in 2014 it had the ability to function in emergency situations based on continued adherence to the standards found in WAC 480-123-030 (1)(g). CenturyLink QC's officer certification for this section is in Attachment A.

(7) Advertising certification, including advertisement on Indian reservations.

Certify it has publicized the availability of its applicable telephone assistance programs, such as Lifeline, in a manner reasonably designed to reach those likely to qualify for service, including residents of federally recognized Indian reservations within the ETC's designated service area. Such publicity should include advertisements likely to reach those who are not current customers of the ETC within its designated service area.

Response: CenturyLink QC certifies that it has publicized the availability of its applicable telephone assistance programs, CenturyLink QC's officer certification for this section is in Attachment A.

(8) Report filing alternatives.

To the extent the company has filed a report with a federal agency that provides the data requested by the commission, the company can refer to that docket number and the date the information was filed with the commission.

Response: The data and certifications required by 47 C.F.R. §54.313 and §54.422 (Form 481) were filed with the FCC and a copy of that filing was submitted to the Washington Utilities & Transportation Commission in this docket, UT-150063 on June 26, 2015.

WAC 480-123-080 Annual plan for universal service support expenditures.

(1) Not later than July 1st of each year, every ETC that receives federal support from any category in the federal high-cost fund must report the planned use of federal support related to Washington state that will be received during the coming calendar year. The report must include the company's planned gross capital expenditures and operating expenses made with federal high-cost support received by the ETC for the coming calendar year along with the description of major projects and affected exchanges.

Mr. Steve V. King

July 1, 2015

Page 6

(2) The report must include a substantive plan of the investments and expenditures to be made with federal support and a substantive description of how those investments and expenditures will benefit customers.

Response: FCC Order 11-161, The ICC/USF Transformation Order comprehensively reformed the universal service and inter-carrier compensation systems to ensure that robust, affordable voice and broadband service, both fixed and mobile, are available to Americans throughout the nation. Since its release in the fall of 2011, it has been repeatedly amended, and the types of high-cost support, methodologies for requesting and accepting support and the models for defining future support have not been completely defined. As such, projections on how future high-cost support will be used would be simply speculation.

To the extent that CenturyLink does receive high-cost support for the period in question, it will be used to provide services at a level that meets the requirements of 47 U.S.C. § 254 addressing the delivery of high quality telecommunication services to customers in the service areas for which it receives said high-cost support. Additionally, and in keeping with the intent of FCC 11-161, high-cost support will be used to expand access to high-speed internet services throughout the state.

Sincerely,

Mark S. Reynolds
