 11 Rate Schedule 41

 rate Schedule 41
 [1] Rate Schedule 41 and 42 customers may choose demand charges at a volumetric rate or based on MDDV. For convenience of presentation, demand charges are not included in the calculations for those schedules.

Column A

 [2] Proposed rates include the effect of removing the current Schedule 215 adjustment and applying the proposed Schedule 215 adjustment. The rate shown is for illustrative purposes only and assumes no other changes to rates occur November 1.

Re: UG-171163—2018 Annual Report on NW Natural's Energy Efficiency Program

Dear Mr. Johnson:

Northwest Natural Gas Company, dba NW Natural (NW Natural or the Company) hereby files the 2018 Annual Report on the Company's Energy Efficiency program. This report is submitted in compliance with the Company's Energy Efficiency Plan, which is by reference part of the Company's Tariff Schedule G, Energy Efficiency Services and Programs – Residential and Commercial that was filed and approved in docket UG-171163.

In 2018, the Company's Energy Efficiency program for residential and commercial customers saved 372,005 therms at a cost of \$2,110,012. The Washington Low-Income Energy Efficiency program saved 7,578 therms at a cost of \$121,602. These two programs, in addition to \$151,723 for the Northwest Energy Efficiency Alliance natural gas market transformation pilot, saved 379,583 therms at a cost of \$2,383,337.

The Company's Energy Efficiency program is monitored by the interested parties who have formed the Energy Efficiency Advisory Group in compliance with the stipulated agreement approved in Order 04 in the Company's last completed rate case, docket UG-080546 and the Company's Energy Efficiency Plan.

I. Introduction, background, oversight and goals

A. Introduction

This annual report covers 2018, the ninth full year that Energy Trust of Oregon provided services and incentives to residential and commercial customers of NW Natural in Washington. It addresses progress toward annual goals, information on expenditures, gas savings, projects completed, incentives paid during the year and highlights of program activity.

B. Background

At the request of NW Natural and following approval granted by the Washington Utilities and Transportation Commission (WUTC), Energy Trust began administering NW Natural's demand-side management programs in Southwest Washington on October 1, 2009. The first year was viewed as a pilot. Satisfied with results from the pilot year, in 2011 the WUTC approved Energy Trust's continued administration of conservation programs for NW Natural in Washington.

C. Oversight

The Energy Efficiency Advisory Group (EEAG) was created, at the direction of the WUTC, to provide advice and oversight for NW Natural and Energy Trust energy-efficiency offerings in Washington. The advisory group is comprised of representatives from NW Natural, Energy Trust, WUTC, Washington Public Counsel, Northwest Industrial Gas Users and the Northwest Energy Coalition.

D. Goals

NW Natural, in collaboration with the EEAG, established performance metrics for 2018. This report presents Energy Trust's performance against those goals. The total savings goal for the portfolio was 359,880 therms. This is comprised of 199,880 therms for Residential and 160,000 therms for Commercial.

UG-171163 Page 3 of 20

II. Annual report highlights

A. General

- In 2018, Energy Trust saved 372,005 therms and achieved 103 percent of the annual portfolio goal.
- Gas efficiency measures installed in 2018 by NW Natural's Washington customers saved 372,005 annual therms of natural gas—including 161,632 annual therms in the Commercial sector and 210,373 in the residential sector.
- A strong local economy has continued to benefit both Residential and Commercial programmatic activity driving many new construction and retrofit projects. New schools contributed heavily to the Commercial track. The New Homes construction market is still strong but slowed slightly and is showing leveling of project volumes which resulted in total savings achieved in 2018 5 percent lower than 2017 savings.

B. Commercial sector highlights

- The commercial sector achieved 101 percent of the annual commercial goal.
- The standard track comprised 67 percent of the total goal (42 percent Existing Buildings, 25 percent New Buildings) due in large part to the high savings from boiler projects and consistent savings from foodservice equipment. The custom track achieved the remaining 33 percent of the total commercial goal.
- Standard track accomplished 99 percent of the budgeted standard track goal and the custom track accomplished 106 percent of the budgeted custom track goal.
- Savings from commercial new building construction was driven by boilers, water heaters, foodservice equipment and radiant heaters.
- The program brought in 17 schools projects that were supported by bonds comprising of 110,599 therms saved, three of which were new school projects and 14 were existing retrofit.
- In 2018, four commercial multifamily projects were completed and received incentives for water heaters, pool heaters and boilers as a result of new outreach efforts. Sites included a new 200-unit multifamily complex and three existing affordable housing locations.
- The commercial program visited over 100 restaurants in fast-growing regions of Clark County to encourage participation, resulting in 13 percent of the program's savings from foodservice equipment.

C. Residential sector highlights

- The residential sector achieved 105 percent of the annual residential goal.
- Energy Trust launched new measures for Southwest Washington multifamily customers, including smart thermostats, gas furnaces, gas fireplaces and tankless water heaters.
- Approximately 35 percent of residential savings in 2018 were from EPS [™] New Construction homes, with home retrofit measures contributing an additional 50 percent of savings. Energy-efficient equipment midstream incentives paid to distributors and retailers made up an additional 14 percent of residential savings, with residential multifamily projects making up the remaining 1 percent.

UG-171163 Page 4 of 20

Home Retrofit

- In 2018, gas furnace savings accounted for 33 percent of the total home retrofit savings.
- The residential program recognized 30 percent more smart thermostats in 2018 compared to 2017, as a result of strategic marketing efforts, instant coupons and cross-promotion with Clark Public Utility District.
- The residential program developed and launched an instant coupon that allows customers to receive smart thermostat incentives online or at the register in select retail stores. In Q4, Energy Trust worked with NW Natural to launch an email campaign to NW Natural Washington customers promoting the instant coupon and black Friday deals. Over 100 smart thermostat coupons were redeemed from this campaign.
- Thermostat offerings accounted for 23 percent of the total residential savings and 47% of Home Retrofit savings.
- Savings from showerheads declined nearly 50 percent when compared to 2017, due to a reduction in the number of participating retailers selling eligible showerheads.
- 2018 was the first year offering measures and incentives for residential multifamily customers. Market adoption was slower than anticipated as customers and contractors became familiar with program offerings. Multifamily projects included the following measures: gas furnaces, gas hearth, smart thermostats, gas tankless water heater and windows.

EPS New Construction

- In 2018, over 700 homes participated in EPS New Construction, achieving 119 percent of the EPS New Construction annual savings goal.
- EPS homes saved more energy on average in 2018 than in 2017. This was a result of more EPS homes than expected built to 20 percent better than code (pathway 2), which require more efficiency and yield more savings than homes built 10 percent better than code (pathway 1).
- More than 3,700 EPS and ENERGY STAR® homes have been recognized since 2010.
- Approximately 45 percent of new homes built in the NW Natural Washington territory participated in the EPS offering.

Trade Ally Network Highlights

• By year-end, 267 trade allies served Washington, up from 236 in 2017, for a net difference of 31. This includes 88 trade allies based in Washington.

D. Program evaluations

In 2018, Energy Trust completed an Existing Buildings Impact Evaluation 2015-2016, which
 is available at https://www.energytrust.org/wp-
 content/up to the (2010) 27(Friddings - Daildings - Daildings

content/uploads/2018/07/Existing Buildings Impact Evaluation 2015-2016.pdf.

- Energy Trust will apply the findings from this impact evaluation to some commercial measures in 2019 to ensure reported savings are in alignment with actual savings.
- In 2019, Energy Trust anticipates completing an Existing Buildings Process Evaluation and a Residential Process Evaluation, both of which will include Washington. Links to evaluation reports will be provided in quarterly reporting once available.

E. Washington Utilities and Transportation Commission performance metrics

The table below compares quarterly results to 2018 goals, as established in NW Natural's Energy Efficiency Plan for Washington (filed December 2017).

2018 Results compared to goals

Metrics	Goal	2018 YTD	Q1 results	Q2 results	Q3 results	Q4 results
Therms Saved	359,880	372,005	44,057	81,330	54,009	192,609
Total Program Costs	\$2,254,265	\$2,110,012	\$363,417	\$525,787	\$451,237	\$769,571
Average Levelized Cost Per Measure	Less than \$0.65	\$0.43	\$0.59	\$0.48	\$0.61	\$0.31
Utility Cost at Portfolio Level	Greater than 1.0	2.46	Reported annually	Reported annually	Reported annually	Reported annually

• Levelized cost is reported per quarter for the projects realized in that quarter.

• This table does not include savings goal or budget associated with NW Natural's Washington Low-Income Energy Efficiency (WA-LIEE) program delivery.

• Northwest Energy Efficiency Alliance (NEEA) gas market transformation activities are not included in this table.

2017 Results compared to goals (for reference)

Metrics	Goal	2017 YTD	Q1 results	Q2 results	Q3 results	Q4 results
Therms Saved	282,539	391,606	74,794	82,776	69,878	164,157
Total Program Costs	\$1,975,211	\$2,152,973	\$442,268	\$416,377	\$557,266	\$737,063
Average Levelized Cost Per Measure	Less than \$0.65	\$0.41	\$0.40	\$0.41	\$0.56	\$0.34
Utility Costs at Portfolio Level	Greater than 1.0	1.69	Reported annually	Reported annually	Reported annually	Reported annually

• NEEA gas market transformation activities are not included in this table.

2018 Utility Cost Test and Total Resource Cost Test benefit/cost ratios by program

Program	Utility Cost Test benefit/cost ratio	Total Resource Cost Test benefit/cost ratio
Commercial programs	2.65	1.98
Residential programs	2.32	1.12
Total NW Natural Washington portfolio	2.46	1.39

• Table uses 2018 Avoided Cost (UCT and TRC would be 1.55 and 0.96 utilizing 2016 Avoided Costs)

• Table does not include NEEA or WA-LIEE expenses

B. Revenue

Source	Actual revenue	Budgeted revenue
NW Natural \$	2,428,812	\$ 2,466,148

2018 NW Natural Washington Report

UG-171163 Page 8 of 20

C. Expenditures

		e	Actual xpenditures YTD	ex	Budgeted penditures YTD	Variance
Commercial program	Commercial	\$	814,938	\$	868,656	\$ 53,718
Commercial program	Commercial administration	\$	37,488	\$	40,956	\$ 3,468
	Commercial total	\$	852,426	\$	909,612	\$ 57,186
Residential program	Residential	\$	1,202,280	\$	1,258,127	\$ 55,847
Residential program	Residential administration	\$	55,306	\$	59,319	\$ 4,013
	Residential total	\$	1,257,586	\$	1,317,445	\$ 59,859
	NEEA Commercial	\$	-	\$	36,359	\$ 36,359
NEEA	NEEA Residential	\$	-	\$	98,303	\$ 98,303
	NEEA administration	\$	-	\$	6,349	\$ 6,349
	NEEA total	\$	-	\$	141,011	\$ 141,011
	Total expenditures	\$	2,110,012	\$	2,368,069	\$ 258,057

- The budgeted expeditures in Energy Trust's system differs from the budgeted expenditures filed in NW Natural's 2018 Energy Efficiency Plan by roughly \$27,000 due to changes made to internal costs that resulted after the efficiency plan was filed. The actual expenditures year-to-date are \$144,253 less than the filed 2018 budget of \$2,254,265.
- Effective Q1 2018, NW Natural decided to fund NEEA gas market transformation efforts directly
 rather than through Energy Trust. This decision was made after completion of Energy Trust's 2018
 budget, which included NEEA expenditures. Going forward, Energy Trust will make no further
 payments to NEEA; however, NEEA funding remains in Energy Trust's budget through the end of
 2018.

D. Incentives paid¹

	Actual ir	centives YTD	Actua	lexpenditures YTD	Percent incentives/ expenditures
Commercial program	\$	438,278	\$	852,426	51%
Residential program	\$	682,269	\$	1,257,586	54%
Total incentives	\$	1,120,547	\$	2,110,012	53%

E. Savings

	Therms saved YTD	Annual goal	Percent achieved YTD	Levelized cost/therm
Commercial program	161,632	160,000	101%	\$ 0.41
Residential program	210,373	199,880	105%	\$ 0.46
Total savings	372,005	359,880	103%	\$ 0.43

¹ NEEA expenditures excluded per NW Natural Washington's Energy Efficiency Plan.

Other	Other	1	1,329

Posidontial soctor mossuros 4

"Other" represents savings from projects that did not complete incentive applications materials ٠ needed to pay incentives, such as by omitting information on incentive application materials (i.e. customer/contractor signature, date of installation on invoice, etc.). Energy Trust claimed savings for these projects because they were influenced by the program even though they did not receive incentives. Energy Trust follows up with participants at least three times to collect any outstanding information. There was no meaningful impact on results (TRC/UCT/Levelized cost < +/- 0.5%)

Table 2: Commercial sector measures

NW Natural Appendix 2: Customer satisfaction

In 2018, Energy Trust conducted short phone surveys of NW Natural customers in Washington to determine satisfaction with their participation in Energy Trust programs. Results from 233 residential customers and 11 commercial customers indicate a generally high level of customer satisfaction. Most residential customers in Washington were satisfied with their overall program experience and some customers were dissatisfied with the turnaround time to receive their incentive.

5			
Residential (n=233)	Dissatisfied	Neutral	Satisfied
Overall experience	1%	5%	94%
Incentive application form	2%	5%	93%
Turnaround time to receive incentive	11%	12%	77%

Table 1: NW Natural Washington residential customer satisfaction 2018

Energy Trust surveyed 11 commercial customers in Washington in 2018. Nearly all respondents were satisfied with their overall program experience, incentive amount, ease of applying for the incentive and interaction with program representatives.

WASHINGTON LOW INCOME ENERGY EFFICIENCY (WALIEE)

NW NATURAL APRIL 25, 2019 2018 Annual Report to the Washington Utilities and Transportation Commission April 25, 2019

Washington Low Income Energy Efficiency Program 2018 Program Results

NW Natural partners with Clark County's Community Development Office and Washington Gorge Action Programs (WAGAP) serving Skamania and Klickitat counties to administer its Washington Low Income Energy Efficiency (WALIEE) program. While offerings are available in Skamania and Klickitat counties, the agency that serves these counties did not provide services to any customers through WALIEE during 2018. Results below are specific to Clark County's Department of Community Services.

In WAGAP's territory, staffing and limited customers have been the historical challenge for the program's gas efforts. In 2018 NW Natural continued engagement with the Energy Project and Washington Department of Commerce, to help address these issues and support gas customers and projects.

The weatherization reimbursement cap increased to \$6,080 per home for the 2018 program year. There continues to be more efficiency efforts than WALIEE program funds cover. The agencies are allotted 15% of reimbursable job costs for administrative costs and allowed an average of \$1,000 per home for Health, Safety, and Repairs (HSR), which are not subject to cost effectiveness tests. A 2018 WALIEE job could cost the program no more than \$7,992 but averaged \$7,600 in 2018.

Measure Analysis:

The figure below provides a breakdown of weatherization occurrences by measure, as well as the associated annual therms savings.

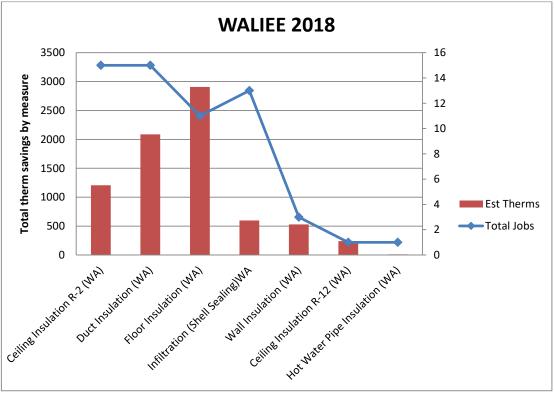

Figure 1: Measure Occurrence and Savings

2013-2018 Efficiency Results:

Efficiency Metric	2018	2017	2016	2015	2014	2013
Homes served	16	13	16	9	10	20
Average Reimbursement per home ¹	\$5,739	\$5,305	\$4,807	\$4,313	\$4,334	\$3,984
Total Reimbursed	\$91,828	\$68,965	\$76,918	\$38,817	\$43,339	\$79,677
Average estimated therms saved per home ²	474	472	378	357	305	351
Total estimated therms saved	7,578	6,132	6,048	3,213	3,050	7,026
Estimated Cost per therm	\$12.12	\$11.25	\$12.72	\$12.08	\$14.21	\$11.34

Figure 2 Efficiency Metrics

2018 Performance Metric	Goal	Actual
Homes served	13	16
Max reimbursement per home (Actual figure = avg per home)	\$7,992	\$7,600
Average estimated therms saved per home ³	405	474
Total estimated therms saved	5,265	7,578
Total Expenditure	\$109,091	\$121,602

Figure 3 Performance and Goal Metrics

Conclusion:

NW Natural is optimistic the work with stakeholders and better utilization of data will result in future growth of the WALIEE program. The progress has led to additional pilots and programs which are anticipated to help development of the program which continues to be positive. We look forward to continuing to grow in 2019.

¹ Note, reimbursed costs only reflect NWN's contribution for home weatherization. HSR and Admin are excluded.

² An impact evaluation has not been conducted on these homes so the actual per therm savings has not been verified. The therm estimates are based on modeling software estimates.

³ See footnote 2

2018 Annual Report for NW Natural

INTRODUCTION

The Northwest Energy Efficiency Alliance (NEEA or "the alliance") is a nonprofit organization working in collaboration with NW Natural, other natural gas utilities and energy efficiency organizations to accelerate the innovation and adoption of efficient natural gas products throughout the region. With funding and engagement from NW Natural and these other entities, the alliance intervenes in the market to create lasting change by removing barriers and leveraging opportunities to accelerate the adoption of cost-effective energy efficiency.

NEEA's vision is energy efficiency as a cornerstone of a vibrant and sustainable Northwest. Two interdependent strategic goals guide alliance efforts to achieve this vision:

- Strategic Goal 1: Fill the energy efficiency pipeline with new products, services and practices
- **Strategic Goal 2:** Create market conditions that will accelerate and sustain the market adoption of emerging energy efficiency products, services, and practices.

This report summarizes the alliance's 2018 market transformation activities and outcomes on behalf of NW Natural. In December 2018, after a two-year collaborative outreach process, NEEA's Board voted unanimously to approve the 2020-2024 Strategic and Business Plans. These plans allow the alliance to sustain a portfolio of initiatives and support functions to transform the market for energy efficiency in the Northwest. For additional information about NEEA's programs or to read NEEA's 2020-2024 Strategic and Business Plans, visit: <u>neea.org/plans</u>.

NATURAL GAS MARKET TRANSFORMATION

By pooling resources through NEEA and working in collaboration with the region, NW Natural is accelerating the development and market adoption of efficient natural gas products, services and practices in the Northwest. The goal of this effort is to deliver more energy efficiency options to NW Natural customers and increase the efficiency of natural gas use in the region. In 2018, NEEA's Natural Gas program focused on increasing manufacturer diversification to support a portfolio of products, expanding partnerships to influence market development, and finding and leveraging synergies between gas and electric programs.

FILLING THE ENERGY EFFICIENCY PIPELINE

Scanning – NEEA staff scan the market to identify promising new energy-efficient natural gas products, services and practices. In 2018, NEEA staff reviewed eight natural gas projects or products, including: combination systems for space and water heating, a gas absorption heat pump for heating and domestic hot water, gas heat pumps and a commercial tankless water heating system. Additional

NWN's Advice 19-03 Exhibit A - Supporting Materials Page 27 of 29

UG-171163 Page 18 of 20

information about each of these products is available through the Regional Emerging Technology Advisory Committee database, which is housed on Conduit: https://conduitnw.org/Pages/Community.aspx?rid=29

NATURAL GAS MARKET TRANSFORMATION PROGRAMS

Efficient Gas Water Heaters – In 2018, alliance efforts focused on understanding market barriers to efficient gas water heating and supporting product development, leveraging lessons learned from NEEA's electric heat pump water heater program. In partnership with the Gas Technology Institute, the program conducted an evaluation of opportunities to reduce cost through removing installation barriers for gas heat pump water heaters, including condensate drainage requirements and ducting complexities. Outcomes from this assessment will be shared with manufacturers to inform future product development efforts. NEEA program staff collaborated with NEEA's electric heat pump water heater team to conduct a <u>market characterization study</u> of the Northwest water heater market. The study, which describes both supply and demand-side market dynamics as well as current market trends, will inform future program continued collaboration with manufacturers, technology developers, utilities and other energy efficiency partners to accelerate product development. It is expected that commercialization by a major manufacturer will culminate with a market launch within NEEA's 2020-2024 Business Cycle.

Combination Water and Space Heating Systems – In 2018, program efforts were focused on accelerating the commercialization of gas combination. The alliance conducted a study to identify ways to reduce the weight, cost and complexity of a gas combination unit under evaluation by a major HVAC manufacturer. Findings of the study, which include overall weight reductions of 13 percent and cost reductions of up to 15 percent, were incorporated into a DOE-funded commercialization project. As of December 2018, the DOE-funded project has produced four next-generation prototype units and field installations are underway. Also in 2018, NEEA finalized and delivered a <u>Gas Heat Pump Product</u> <u>Characterization</u> report to key market partners. The report provides quantitative and qualitative research that new market entrants can use for identifying product capacities and features, yielding the highest probability of market success. Finally, in late 2018 the program began a project with manufacturer Rheem and technology developer SaltX, to accelerate development of a natural gas combination space and water heating unit using salt to store and amplify heat. A proof-of-concept prototype demonstrating energy performance is expected to be complete in early 2019.

Super-Efficient Gas Clothes Dryers – Gas dryers have a very low market share in the Northwest – between 5 and 10 percent of the market – making extra-regional partnerships essential for program success. In 2018, the program focused on building partnerships to influence market development of a high-performance ENERGY STAR or Most Efficient gas dryer. Program staff developed a "Strategic Partnership Opportunity" tool to highlight Northwest and national gas dryer market share opportunity to manufacturers to demonstrate the business case for developing efficient gas dryers. The program also held informational webinars with seven utilities across the nation to gain utility support for an improved federal test procedure and for products that save energy and deliver a satisfactory customer experience. Thus far, two utilities have signed on to the NEEA specification.

Condensing Rooftop Units – In 2018, the program installed and commissioned condensing rooftop units (C-RTUs) on four commercial buildings in the Northwest, including one in NW Natural service

NWN's Advice 19-03 Exhibit A - Supporting Materials Page 28 of 29

UG-171163 Page 19 of 20

territory. Pilot results will provide energy savings and product performance data for utility programs and inform future market channel development work. The program team also completed market research on C-RTU installation practices. Results of the research will be included in the final field trial report and used to inform manufacturer product development and installation guidance information for market actors. The program team was a driving member of a technical subcommittee committed to revising the Canadian Standards Association Group test procedure for commercial gas-fired package furnaces that will allow consumers and manufacturers to differentiate products based on efficiency. This international subcommittee is comprised of industry partners (including manufacturers), North American utilities and governmental organizations.

Hearth Products – In 2018, the program conducted industry outreach to gauge interest in the development of a low capacity hearth. This outreach was met with much hesitation and lackluster response by both industry organizations and manufacturers, resulting in ramped down efforts by NEEA staff.

DATA, RESEARCH AND ANALYSIS

The alliance pools regional resources to conduct research and evaluation and provide data and analytical services for the benefit of NW Natural customers.

EVALUATION AND MARKET RESEARCH

Market Research and Evaluation – The alliance conducts robust market research to inform market transformation program design and provide critical data and analysis. In 2018, NEEA staff published market characterization studies for the Northwest water heating market and the gas heat pump market, both of which are publicly available at <u>neea.org/resources-reports</u>.

Regional Building Stock Assessments – In 2018, the alliance published final reports and data collected as part of the Residential Building Stock Assessment (RBSA) and worked with regional stakeholders to develop a new population frame and began fielding the Commercial Building Stock Assessment (CBSA). The RBSA and CBSA are comprehensive inventories of the factors that influence energy use (both electric and natural gas) in existing Northwest buildings. Results inform utility energy efficiency programs as well as regional power planning efforts. The primary focus of 2019 is recruitment and fieldwork. CBSA data will be available by Dec. 31, 2019 with associated reports published in the first quarter of 2020.

REGIONAL COLLABORATION AND COORDINATION

REGIONAL COLLABORATION

EFFICIENCY EXCHANGE – In May 2018, the alliance co-hosted the annual Efficiency Exchange conference in collaboration with Bonneville Power Administration and the Northwest Power and Conservation Council. The regional conference, which provides a forum for energy efficiency professionals to share knowledge, explore emerging innovations and discuss the direction of utility efficiency programs, drew more than 450 attendees.

CONDUITNW.ORG – Developed in partnership with the Bonneville Power Administration, the Conduit online community facilitates information-sharing, coordination and collaboration among energy

efficiency stakeholders in the Northwest. More than 3,300 energy efficiency professionals across the Northwest, including approximately a dozen from NW Natural, currently use Conduit.

REGIONAL COORDINATION

Alliance Natural Gas market transformation programs are coordinated through the Natural Gas Advisory Committee, whose membership includes representatives from NW Natural staff. NW Natural is also represented on NEEA's Board of Directors. NEEA staff are grateful for the time and energy NW Natural staff dedicate to participating in these forums and on NEEA's Board of Directors, including:

Board of Directors: Holly Braun, Manager - Energy Policy and Sustainability

Natural Gas Advisory Committee: Holly Braun, Manager – Energy Policy and Sustainability; Gary Heikkinen, Sales Engineer; Rick Hodges, Conservation Manager

ADDITIONAL INFORMATION

For additional information, NEEA's <u>2018 Quarterly Performance Reports</u>, <u>newsletters</u> and the <u>2017</u> <u>Annual Report</u> are available online at neea.org.

NEEA staff encourage stakeholder participation and appreciate input at all NEEA board meetings, Advisory Committee meetings and energy efficiency events around the region. The next NEEA Board of Directors meeting is June 4, 2019 in Portland, OR. Meeting details will be posted on <u>neea.org</u> in advance.
