

EXHIBIT NO. BHP-4

**August 9, 2010 – CenturyLink Response to
Charter Data Request No. 25**

Washington
Docket No. 100820
Response to Charter Data Request No. 25
Respondent: Guy Miller
Witness: TBD
Response Date: August 9, 2010

25. Admit that Charter must submit an LSR to CenturyLink as the mechanism to request that CenturyLink transfer, or port, an end user customer's telephone number to Charter.

RESPONSE:

CenturyLink objects to this request because it is not reasonably calculated to lead to the discovery of admissible or relevant evidence. This is not the proper forum for determining issues related to the provisioning of specific wholesale services. Without waiving and subject to said objections, CenturyLink responds as follows:

Admit, with respect to current practice. The mechanism to request a port of an end user's telephone number is established in federal law pursuant to 47 CFR 52.26, is applicable to all carriers including CenturyLink, and may be subject to future change.
