Subject: Comments from Fuse Members on Dockets UG-141169 and UE-141170
Attachments: UG-141169 and UE-141170 (02-29).pdf; UG-141169 and UE-141170 (02-29. unique comments).pdf

To Whom It May Concern:

Attached are two documents with comments from 1,541 Fuse members in reference to Dockets UG-141169 and UE-141170. The first attachment are all the members that signed on to the letter down below referenced as *Letter to UTC Commissioners*.

In addition, some individuals across the state changed the format of the letter. The second attached document are those individuals with their comments.

Letter to UTC Commissioners:

Dear UTC Commissions,

Please do not accept any 20-year energy proposal from Puget Sound Energy that does not address a plan to retire the dirty, dangerous and increasingly expensive coal plant that it invests in. We also urge you to seek a just transition for the coal plant's workers and their families.

This is a huge opportunity to invest in local jobs and a clean energy future instead of dumping millions of dollars into an outdated coal-fired power plant. In addition to creating good paying local jobs that will boost our economy, dumping coal will improve public health and significantly cut carbon pollution.

Owners of more than 200 coal plants across the country have decided that coal is too costly to continue to burn, including Portland General Electric and TransAlta here in the Northwest. You said it yourselves: "To embark on investments [in Colstrip] with so much uncertainty could be harmful to PSE, its ratepayers and the broader public interest."

As PSE finalizes its 20-year electricity plan, it is in our best interest to realize the risks associated with coal power to our health, the environment and ratepayers. It is time to develop a plan to replace its coal power with sustainable energy - energy efficiency upgrades and wind and solar power.

The choice is whether to spend millions of dollars propping up the aging, out-of-state coal plant in Colstrip, MT or invest in clean energy and jobs for Washington's future. Let's create thousands of jobs, and take a step on climate change in the process.

Please let me know if I can provide any additional information or if you have further questions.

Sincerely,

Tiffany

Tiffany McGuyer

Kevin	Wildermuth	1513 30TH AVE S	SEATTLE	98144	kwildermuth@xsrvives.com	2063284324	<p>Now that the Paris Climate accords have been signed it's even more important that every utility in the country to transition away from coal. I urge you not to accept any 20-year energy proposal from Puget Sound Energy that still leans on coal and does not transition to renewable energy sources. <input type="checkbox"/></p> <p><input type="checkbox"/> Please don't waste this opportunity to end these dirty coal emissions, give us all healthier lives and help heal our planet's climate. You would not be alone, as over 200 coal plant owners around the country have made the right choice, saving money in the process. As you must know, some of those companies are here in the Northwest. <input type="checkbox"/></p> <p><input type="checkbox"/> Let's move on to a future of renewable energy jobs and clean technology. It's time to reject the energy practices that date back to the industrial revolution, which have put life as we know it in peril.</p>
Roy	Munroe	127 NW Decatur st	Olympia	98502	roymunroe9041@comcast.net		<p>It is time to put an end to dirty energy production and move forward into the future with clean, safe and renewable energy production and consumption. Our ecosystems are not something that can renew itself easily as it has taken billions of years to get to the balance that was achieved for all life to thrive and within a very short time span it has taken a very short time by any standards to render our ecosystems in some cases truly non-usable for the damage done to virtually every kind of ecosystems that make up our country. The balance of our planet is at stake and so is life as we know it! The coal industry demolishes huge tracts of land and whole mountains to extract the coal leaving poisoned lands, poisoned water and turns huge parcels of once healthy and life thriving lands into nothing less than unusable land for any thing worth while and it will take many many years for those lands to start to rectify the damage done if even then! The old ways of production, consumption are at the end of their lif</p>

Cathy	Barich	3506 - 108th Pl. N.E., #1	Bellevue	98004 cbarich@comcast.net	425-828-0391	<p>Every thing I read about solar power I see is expensive and has a lot of toxic waist associated with it. Making it and disposing the used ones (500 million tons in California). Coal has been around for hundreds of years and if we continue to use it I know we can make it better, & cleaner. If we don't use it we will just end up with more toxic waste from solar and bad batteries from trying to store wind power. We are moving too fast off of coal and natural gas lets look at the choices and make good decisions with peoples ability to provide for their family as a factor. If we change now the coal will still be there for our grand kids to deal with. Mike</p>
Micheal	Hayden	PO BOX 62	COUGAR	98616 mhayden@tds.net		<p>Please review, rethink, your continued reliance on coal from a dangerous and increasingly expensive coal plant.</p> <p>We know you are aware that there is an opportunity to invest in local jobs and a clean energy future instead of dumping millions of dollars into an outdated coal-fired power plant. In addition to creating good paying local jobs that will boost our economy, dumping coal will improve public health and significantly cut carbon pollution.</p>

Kathryn	Fletcher	1521 29th Ave	Seattle	98122 diazfletcher52@comcast.net	206328432	<p>☐ Owners of more than 200 coal plants across the country have decided that coal is too costly to continue to burn, including Portland General Electric and TransAlta here in the Northwest. You said it yourselves: "Let's embark on investments [in Coalstrip] with so much uncertainty could be harmful to PSE, its ratepayers and the</p>

Karen	Genest	17200 SE 26th Dr Unit 38	Vancouver	98683 karen.genest@gmail.com	3605462503	<p>We need an energy proposal from Puget Sound Energy that addresses the future, retiring the dirty, dangerous and expensive coal and investing in the future of green energy. ☐</p> <p>We need to take the initiative to invest in local jobs and a clean energy future, not continuing to dump millions into an outdated coal-fired power plant. It's a win-win for everyone. We'll have good paying local jobs, boost our economy and cut carbon pollution. ☐</p> <p>Coal is becoming much more expensive and even your company agreed to embark on investments [in Colstrip] with so much uncertainty could be harmful to PSE, its ratepayers and the broader public interest. ☐</p> <p>As PSE finalizes its 20-year electricity plan, it is in our best interest to realize the risks associated with coal power to our health, the environment and ratepayers. It is time to develop a plan to replace its coal power with sustainable energy - energy efficiency upgrades and wind and solar power. ☐</p> <p>The choice is whether to spend millions of dollars propping up a coal plant that does not address a plan to retire the dirty, dangerous and increasingly expensive coal plant that it invests in. ☐</p> <p>I've been a PSE customer since 2004, and am enthusiastic about their Green Power credits, their investment in wind power, and their rebate programs for Energy-Smart Buildings. However, in light of all we know about climate change, their decision to continue to use coal-generated energy from Colstrip, Montana seems short sighted and dangerous. Please do everything in your power (no pun intended!) to significantly reduce this energy source within Puget Sound Energy's portfolio, or better yet, remove it entirely. ☐</p> <p>Thank you! ☐ Susan Weston</p>
Susan	Weston	6512 140th Pl NE	Redmond	98052 susanweston@live.com	4258856199	<p>Coal usage has to stop and soon! Our planet does not have time for us to dither around on this. It isn't even cheap! ☐</p> <p>Please do not accept any 20-year energy proposal from Puget Sound Energy that does not address a plan to retire the dirty, dangerous and increasingly expensive coal plant that it invests in. We also urge you to seek a just transition for the coal plant's workers and their families. ☐</p> <p>This is a huge opportunity to invest in local jobs and a clean energy future instead of dumping millions of dollars into an outdated coal-fired power plant. David	Perk	842 NE 67th St	Seattle	98115	98115	206 527 4702	<p>Does PSE's 20-year proposal include details about their transition to 100% renewable energy by 2030? If it doesn't, send it back for a rewrite. ☐</p> <p>☐ The Paris climate agreement is toothless, but clear: it's time to transition off of fossil fuels. It's obvious that Colstrip needs to close as soon as possible. I would go farther and point to our rapidly diminishing glaciers and ask, How long can we depend on hydro power? Pretty soon there won't be enough water to go around; we are already seeing numerous conflicting priorities. Reducing our dependence on dams for hydro should be part of the solution. PSE had better be planning for a future that includes far more solar, wind and geothermal than they are using now. There are good jobs in that transition. Let's plan on it. ☐</p>
Sheri	Staley	6052 E Picketing Rd	Shelton	98584	98584	3604276303	<p>☐ The time for pussy footing around this issue is long past. Just think if companies such as Exxon Mobile had done the right thing 30+ years ago....we would not all have to be concerned that Florida may be under water in our lifetimes. ☐</p> <p>☐ Please do not accept any 20-year energy proposal from Puget Sound Energy that does not address a plan to retire the dirty, dangerous and increasingly expensive coal plant that it invests in. We also urge you to seek a just transition for the coal plant's workers and their families. ☐</p> <p>☐ This is a huge opportunity to invest in local jobs and a clean energy future instead of dumping millions of dollars into an outdated coal-fired power plant. In addition to creating good paying local jobs that will boost our economy, dumping coal will improve public health and significantly cut carbon pollution. ☐</p> <p>☐ Owners of more than 200 coal plants across the country have decided that coal is too costly to continue to burn, including Portland General Electric and TransAlta here in the Northw</p>

You said it yourselves: "Let's embark on investments [in Colstrip] with so much uncertainty could be harmful to PSE, its ratepayers and the broader public interest. ☐</p>

Eric	Strid	PO BOX 2028	White Salmon	98672	ericwstrid@gmail.com		<p>I am an electrical engineer and retired CEO of a high-tech company. I have studied the nascent clean energy revolution and am confident that any further investments in fossil fuel infrastructure will become stranded well before the end of its useful lifetime. This is simply because renewable generation and storage technologies will continue to get cheaper while fossil fuels will continue to get more expensive as they get scarcer and society adds a price on their GHG emissions. When China starts their cap-and-trade system, nearly half of the world's emissions will have a price on GHG emissions. ☐</p> <p>Please do not accept any 20-year energy proposal from Puget Sound Energy that does not address a plan to retire the dirty, dangerous and increasingly expensive coal plant that it invests in. We also urge you to seek a just transition for the coal plant's workers and their families. ☐</p> <p>This is a huge opportunity to invest in local jobs and a clean energy future instead of dumping millions of dollars into an outdated</p>
