Notes:

*: Non-cancer COC

--: Not applicable

^: Contaminant not analyzed in Alluvium WBZ groundwater.

o: Contaminant analyzed in Alluvium WBZ groundwater and determined to not be a COC.

X: Human health COC for Alluvium WBZ groundwater

1: No further consideration of phosphorus is necessary in Gasco OU FS (DEQ 2021).

2: These COIs were identified as COCs in the HERA (Anchor QEA 2014) based on the occupational worker exposure to Alluvium WBZ groundwater RBCs for the ingestion and inhalation exposure pathways. These COIs are not COCs based on the Alluvium WBZ groundwater occupational worker scenario RBCs for the HERA Addendum and FS based on the dermal and inhalation exposure pathways as discussed at the February 8, 2023, meeting with DEO.

3: DEQ considers dioxins/furans in the lower and deep lower alluvium to be attributable to off-site sources and are not a COC for the Gasco OU (DEQ 2021).

µg/L: micrograms per liter

B(a)P: benzo(a)pyrene

CAS: Chemical Abstracts Service

COC: contaminant of concern

COI: contaminant of interest

CONV: conventional

DIOXFUR: dioxins/furans

GSA: geographic subarea

HERA: human health and ecological risk assessment

mg/L: milligrams per liter

ng/L: nanogram per liter

OU: operable unit

PAH: polycyclic aromatic hydrocarbon

PRG: preliminary remediation goal

RBC: risk-based concentration

Siltronic: Siltronic Corporation

SVOC: semivolatile organic compound

TCE: trichloroethene

TEQ: toxic equivalence quotient

VOC: volatile organic compound

WBZ: water-bearing zone

Dw: diffusion coefficient in water

g/mol: grams per mole

H': Henry's constant (unitless)

KH: Henry's constant ($\text{m}^3\text{-atm/mol}$)

Koc: organic-carbon partition coefficient

Log: logarithm

$\text{m}^3\text{-atm/mol}$: atmospheres cubic meter per mole

mg/L: milligrams per liter

mg/ m^3 : milligrams per cubic meter

MW: molecular weight

P: vapor pressure

RBC: risk-based concentration

RBDM: risk-based decision making

S: solubility

v: volatile

Vol Class: volatility classification

Human Health PRG Table 12

Construction and Excavation Worker Chronic and Subchronic TPH RBCs

TPH Risk Area	TPH RBCs		
	Soil Ingestion, Dermal Contact, and Inhalation (RBC _{SS})		Groundwater in Excavation (RBC _{WE})
	Construction Worker (mg/kg)	Excavation Worker (mg/kg)	Construction & Excavation Worker (µg/L)
Gasco Site-Specific TPH RBCs (2021) – Subchronic Toxicity Values¹			
Former Spent Oxide Area (RA-1)	2,400	>Max	820
Former Lampblack Storage Area (RA-2)	21,000	>Max	1,700
Former Tar Settling Pond Area (RA-3)	14,000	>Max	1,500
Former Koppers Land Disposal Area (RA-4)	10,000	>Max	2,500
Former Naphthalene Plant Area (RA-5)	9,400	>Max	12,000
Gasco Site-Specific TPH RBCs (2021) – Chronic Toxicity Values			
Former Spent Oxide Area (RA-1)	1,600	>Max	810
Former Lampblack Storage Area (RA-2)	5,500	>Max	1,600
Former Tar Settling Pond Area (RA-3)	4,600	>Max	1,400
Former Koppers Land Disposal Area (RA-4)	3,900	>Max	2,200
Former Naphthalene Plant Area (RA-5)	3,600	130,000	5,600

Notes:

>Max: The constituent RBC for this pathway is greater than 100,000 mg/kg. The TPH RBC is greater than the maximum amount that would be present if all of the initial air space is filled with petroleum product. DEQ believes it is highly unlikely that such concentrations will ever be encountered.

1. Site-specific TPH RBCs calculated using subchronic toxicity values included in the TPH RBC workbooks provided with DEQ's December 16, 2021, PRG memorandum (DEQ 2021).

µg/L: micrograms per liter

DEQ: Oregon Department of Environmental Quality

mg/kg: milligrams per kilogram

RA: risk area

RBC: risk-based concentration

TPH: total petroleum hydrocarbons

Rsw (L/kg)	different values	different values	--	calculated
LF (kg/L)	different values	different values	--	calculated
Calculations				
All calculated fields	different values	different values	--	calculated

Notes:

This table summarizes noted differences between the 2018 and 2021 TPH RBC workbooks (based on evaluation of the site-specific workbooks for RA-1-COMPB) and differences between the RBDM workbook. This table may not be comprehensive of all differences between workbooks.

1. 2021 TPH RBCs workbooks provided with DEQ's December 16, 2021, PRG memorandum (DEQ 2021).
2. 2018 TPH RBC (Anchor QEA 2018).
3. DEQ's 2018 RBDM workbook (DEQ 2018).

--: not applicable

µg/m³: micrograms per cubic meter

t: lag time

B: relative hydrophobicity

cm²/s: square centimeter per second

cm³/g: cubic centimeter per gram

DA: apparent diffusion coefficient

Dair: diffusion coefficient in air

DEQ: Oregon Department of Environmental Quality

Dw: diffusion coefficient in water

g/cm³: grams per cubic centimeter

g/mol: grams per mole

H: Henry's constant (unitless)

hr: hour

kg/L: kilograms per liter

KH: Henry's constant (m³-atm/mol)

Koc: organic-carbon partition coefficient

L/kg: liter per kilogram

LF: leaching factor

Log: logarithm

m³-atm/mol: atmospheres cubic meter per mole

mg/kg: milligrams per kilogram

MW: molecular weight

MWi: molecular weight of constituent "I"

P: vapor pressure

ppm: parts per million

RBDM: risk-based decision making

RCB: risk-based concentration

Rfc: reference concentration

Rfd: reference dose

rpi: density (g/cm³)

Rsw: soil sample/pore water concentration ratio for a 4-phase systems

t*: time to reach steady state

TPH: total petroleum hydrocarbons

Xi: mole fraction of constituent "I"
