RE: Docket UE-152072—2016-2017 Biennial Conservation Report—REVISED

In accordance with WAC 480-109-100(3), Pacific Power & Light Company, a division of PacifiCorp, submits for filing a revised 2016-2017 Biennial Conservation Report.

The revised report incorporates the revised conservation report to Commerce, which was updated at the request of Commission staff to better indicate the excess conservation from prior bienniums. In addition, updates were made to the Home Energy Reports savings to correct the order in which the adjustments for evaluation results and second-year incremental savings were applied to reported results. The change reduced the overall results and available excess conservation by 418 MWh for the biennial period. Even with this reduction, Pacific Power has still achieved results that exceed the target subject to penalty. Cost-effectiveness for the biennial period was re-assessed and the results did not change for the portfolio. Pacific Power also included additional information requested by Commission staff to further illustrate the adjustments and calculations associated with the Home Energy Reports on pages 10-12.

In addition, updates were made to the 2017 wattsmart business sector level forecasts for energy savings and expenditures in Table 2. This update corrected a transposition of the agricultural sector with industrial and commercial sectors. The totals for the program and year are unchanged. A similar change was made for Table 3.

All of these changes have been discussed with the company's Washington Demand-Side Management Advisory Group.

Please direct questions to Ariel Son, Regulatory Affairs Manager, at (503) 813-5410.

Sincerely,

_____/s/
