RE: Docket Nos. UT-900726 and UT-900733

Dear Mr. Curl:

When we mailed the Reply Comments of AT&T Communications of the Pacific Northwest, Inc. on November 2, 1990, we inadvertently included an incorrect document as Attachment A. In order to rectify this occurrence, herewith enclosed is the original and twenty copies of the correct document for Attachment A.

Please disregard the "Confidential" Notice stamped on each page of Attachment A; this document is available for public disclosure.

Very truly yours,

  
William P. Eagles

January 11, 1990

Mr. Paul Praskac  
Marketing Supervisor  
AT&T  
265 North Maple Ave.  
Basking Ridge, N.J. 07820

Dear Mr. Praskac:

SUBJECT: TESTMARK supplemental REPORT - COCOT - CALL BLOCKING  
QUOTE: 89-0360  
REFERENCE: OUR INITIAL REPORT ON THIS SUBJECT DATED DECEMBER 11, 1989  
AND YOUR FAX MESSAGE DATED DECEMBER 21, 1989 IN WHICH YOU  
REQUESTED VERIFICATION TESTING

We have completed the verification testing mentioned in the reference FAX message. The results verify our earlier statement, i.e., that all five of the COCOT units tested (Kerr, Elcotel, Protel, Ernest and Intellicall) can be programmed to block certain calls and let other calls pass. We specifically programmed each unit to block 10XXX+1 and 011 (sent paid) calls while concurrently allowing 1+ calls, 0+ calls and 10XXX 0+ calls (non sent paid) to pass. All five units functioned as intended in that the 10XXX 1+ and 011 calls were blocked and the 1+, 0+ and 10XXX 0+ calls were passed.

If you have any additional questions or wish to discuss this matter further feel free to call at any time.

Sincerely,

EMMANUEL E. TZOUANAKIS  
Director - Switching Systems  
and CPE Evaluation
