Hello,  
Here are my comments to the EIP.

PSE should work to

- 1) Reduce peak demand by requiring PSE to expedite and expand their Demand Response and Time Varying Rates programs.
- 2) Reduce price volatility and greenhouse gas emissions by requiring PSE to accelerate acquisition of new renewable clean energy resources.
- 3) Increase the resiliency of the electric system by requiring PSE to increase programs that encourage local solar and battery installations.
- 4) Reflect future capacity needs more accurately by requiring PSE to revise temperature modeling to reflect the changing climate and then resubmit their CEIP.
- 5) Stop promoting Natural Gas appliances and use, since Natural gas use will need to be reduced sooner, and eventually cease later.

Thank you
