**PC-3 Re: Responsive Testimony of Thomas E. Schooley, p. 39.**

Please provide all evidentiary support for Mr. Schooley's statement on lines 2-4 that "[m]any low-income customers may be in [the] situation" of having "an all electric house that is poorly insulated."

**RESPONSE:**

Mr. Schooley simply points out a likely situation where a low-income, high-use customer would benefit by having a higher basic charge and lower volumetric charge.
