I am a retired environmental manager. I specialized in hazardous materials, the Clean Air Act and the Clean Water Act. I am very supportive of the proposed Solar project in Moxee.

It should be well understood by now that global warming is causing serious and deadly problems. We must take immediate action to replace polluting power plants. The Moxee site is great. No noise, no pollution, a project we can be proud of. Continued heat waves and drought will reduce hydropower. That is already happening. We need solar power.
