

STATE OF WASHINGTON

ENERGY FACILITY SITE EVALUATION COUNCIL

PO Box 43172 • Olympia, Washington 98504-3172

July 30, 2021

TO: Interested Persons
FROM: Sonia Bumpus, EFSEC Manager
SUBJECT: Mitigated Determination of Nonsignificance – Goose Prairie Solar project

Under the State Environmental Policy Act, or SEPA, the Energy Facility Site Evaluation Council (EFSEC) is required to ensure that environmental values are considered for projects under its jurisdiction. As the EFSEC SEPA Responsible Official, I have reviewed environmental information submitted by the proponents and others regarding the proposed Goose Prairie Solar project.

Enclosed you will find a Revised Mitigated Determination of Nonsignificance that includes mitigation so that the proposal would not have an adverse impact on the environment. The documents are also available on our website here: <https://www.efsec.wa.gov/energy-facilities/goose-prairie-solar/goose-prairie-mdns>.

The public and agencies were invited to comment June 24, 2021 thru July 8, 2021. EFSEC appreciates your input and participation in the SEPA public comment process.

For more information please contact Amí Kidder, EFSEC Siting and Compliance Manager (360) 664-1305 or by email at ami.kidder@utc.wa.gov.
